PROJECTS

Weather App

May 2020 - May 2020

<https://github.com/sharmaumang001/WeatherApp>

This is a App made for learning basis.

* It fetches your location and shows you the weather through open Weather Api.

*It is programmed to response at minor change in locations.

*You can also search your city and get the location

Mobile Browser

Jun 2020 - Present

<https://github.com/sharmaumang001/Mobile-Browser>

In this app i used WebView +Pop up menu

*This app loads Url.

*Able to search non-url searches.

*It has a toolbar in the last , which helps us to navigate between screens and stop/refresh screen.

*Pop-up menu added , usage is still under development.

Attendance Manager

Feb 2020 - Present

<https://github.com/sharmaumang001/Attendance-manager>

Project started on Necessity basis.

*This app has 10 pre-saved subjects.

*This helps student to monitor attendance.

*Resumed the project for upgrading UI.

Flash Chat

May 2020 - Present

<https://github.com/sharmaumang001/FlashChat>

This app uses Firebase.

*This has Register and login feature in it.

*It stores its messages on firebase database.

*It uses recycler View to display chat.

*Currently working on improving UI
